

CIP4 Confluence

Welcome to the technical website of our Confluence System. As you see we have changed our system infrastructure. You can find a short introduction into the new infrastructure on the page [Confluence How-To's](#).

The new environment is aimed to make CIP4's work more efficient through better collaboration and complete transparency. Confluence is the place where we can share information, organize work group meetings and CIP4 Interops, manage questions, make decisions and much more. Atlassian Confluence is very powerful and easy to use application. Further, many companies use Confluence as well. So, many users should be already familiar with the application.

At our relaunch we also decided to bring CIP4 closer to non-members. Everyone who is interested in the CIP4 Organization and its technologies is able to [register now](#). Each registered user will become a "CIP4 Visitor". Visitors are allowed to access the Work Group Spaces, subscribe to blogs, create JIRA issues, ask questions in [Confluence Questions](#) and more.

TSC call for participation

Rainer Prosi posted on Apr 29, 2018

Due to the reduction of the number of work groups, we need to reorganize the membership rules for the Technical Steering Committee (TSC)

If any active CIP4 member is interested in joining the TSC, please send an informal email to secretariat@cip4.org stating this intention.

Requirements for TSC membership:

- Active participation in TSC phone conferences
- Active participation in interop meetings and TSC face to face meetings (Joining most interops is sufficient)
- Technical interest and proficiency with JDF, XJDF, PrintTalk etc. at a reasonable level. (No formal tests required)
- Non-partisan technical interest in the developments of CIP4

The current TSC will review the applications by early June 2018 and unless we have a deluge of applications, I anticipate that any reasonable application will be accepted.
