

MIS ICS

This CIP4 JDF Interoperability Conformance Specification (ICS) defines the interoperability requirements related to the communication between MIS and production equipment. It describes requirements that are generic for all stages of the production process (pre-press, press and post-press). It focuses on the main JDF structure and the way Workers communicate status information back to the MIS.

Shortname	MIS
Version	1.5
Mission	Interoperability between MIS and production equipment
